

LASER MAZE

Agility, Balance & Coordination

INTRODUCTION

In this activity the lasers are substituted for string or yarn. The goal is to get through the maze without touching the string. It will have you twisting and turning as you navigate your way

WHAT WE NEED

- String/ yarn or you could use strips of crepe paper instead
- Scissors
- A basket of treasure e.g. costume jewellery, gemstones, coins
- Low tack masking tape or decorators tape (optional)

WHAT TO DO

To set up the maze a narrow hall way is ideal. Zig zag your string across anchoring it to fixed structures or use masking tape to fix to the wall. Place the basket of treasure at the end of the maze. Children navigate their way through, collect a piece of treasure and return to the start.

Adapt the game by changing the course, adding small bells or introduce a time limit.
