

BABY RAIN STICK

Creative Decorating

INTRODUCTION

A fun activity for older children with adult supervision.

WHAT WE NEED

- Strong tube cardboard
- Small hammer
- Panel pins
- Rice, lentils, or barely etc.
- Sticky black plastics or wallpaper/wrapping paper

WHAT TO DO

Tap the pins all around the tube. When you look down the tube they should crisscross one another. Tape up one end of the tube and add rice.

To decorate:

Cut a piece of sticky back plastic or paper around the same length of your rainstick. Twist round and stick at the end. Use different colours for a great effect! Apply this to the tube, ensuring all panel pins are securely covered.
