

# BATHTUB FISHING

## Experimenting & Exploring

### INTRODUCTION

Bring the ocean to your bathroom! Go fishing with this fun activity. It's great for eye hand coordination and experimenting with the properties of water.

### WHAT WE NEED

- A stick or wooden spoon for the fishing rod
- String
- Paper clips
- Blue food colouring if you have it
- Small toys or objects that sink and float

### WHAT TO DO

To make a fishing rod, tie a length of string to the end of the stick or spoon. Bend one end of a paper clip to make a hook and tie the other end to the string. Fill the bath with water and add some food colouring. You can place towels on the floor in case it gets slippery. Add some small plastic toys and objects. See how many things you can catch on your hook!
