

# SINK OR FLOAT

## WATER PLAY FUN

### INTRODUCTION

Let your child[ren] explore and work out which items might sink or swim in some water. A great way to introduce some science to play.

### WHAT WE NEED

- Container of water: the bath, a bowl, plastic box
- Items from either nature or the home that you don't mind getting wet, with a mix of items that might float or sink.

### WHAT TO DO

Fill the container with water, then lay out different items for the child to explore and put into the water. At first let them explore themselves then start asking if they think items will sink or float. Maybe include a few items that could be harder to guess, like a piece of paper or an apple.
