

LIFE SIZED BOARD GAME

Dice Based Interactive Game

INTRODUCTION

An activity for older children to create a life sized interactive board game. In this game the child makes the rules, using their own ideas for challenges and prizes.

WHAT WE NEED

- Paper/Card/Cardboard
- Pens
- A Dice

WHAT TO DO

First encourage the child to think of an idea for their game, for example they could have prize spaces, challenge spaces, move forward, move backwards, and roll again.

Write 'Start' on one piece of paper and 'Finish' on another, then fill as many other spaces as required. Help the child to lay out the spaces in any format they like. Grab a dice and have fun!
