

# Spaghetti & String Printing

## Wiggly Squiggly String Art

### INTRODUCTION

Using spaghetti and string to make different patterns and prints, or just have fun exploring the textures and colours mixing together.

### WHAT WE NEED

- Spaghetti
- String
- Recycled food containers
- Paper and Paint

### WHAT TO DO

**Spaghetti:** Cook a good quantity of spaghetti, allow to cool and place in food containers. Add different colours of paint to the containers. Make patterns and prints on the paper using the different coloured spaghetti.

**String:** Dip lengths of string into paint. Fold paper in half to make a crease then open out flat again. Drop the coloured string pieces onto one side of the paper, fold it back over and press firmly. Open it out to see your finished pattern.
