

HOVERCRAFT

Creative DIY Activity

INTRODUCTION

In this activity, children can make their own hovercraft using these simple items.

WHAT WE NEED

- Balloon
- Flat/smooth surface
- CD
- Water
- Liquid
- Bottle Top

WHAT TO DO

Roll out some blue tack into a long sausage shape. Attach the blue tack to the bottom of the water bottle lid, making sure it goes all around the rim and no gaps. Place the bottle lid over the hole in the middle of the CD, again make sure there are no gaps by pressing down firmly.

Blow up the balloon, pinching the neck to attach to the bottle lid. Place the CD flat on the surface and let go of the balloon. Give it a light push and watch it float over the surface.
