

This template can be very handy for assessing the impact your play pod is having. Think up some statements which link to your outcomes and fill in the boxes. Take one reading before you carry out an activity and once it is complete take a second reading to see if there has been a change.

Example: Children have lots of creative ideas for play at playtime.

Ask the person whose response you are recording to place a sticker on or to circle the number that best reflects the extent to which they agree with the attached statement- with 1 being strongly disagree and 10 being strongly agree. Do this again for the second reading.

When complete this star can act as an effective visual representation of the impact your activities are having. The quantitative data gathered will also be helpful in reporting on the success of your Play in a Pod project!
